2. Plug Lamp to Holder

3. Connect Balloon with Balloon internal Stand and connect internal power lines

4. Mount Screw with Fix Balloon and Basement , connect the external electric cable

5. Mount Tripod Stand with Balloon

Tips

Tip1.

When you use the crystal balloon, please make sure power the fan first after the balloon comes to round--be inflated full shape then turn (Round switch for fan and Square switch for light under base), Commonly it takes 3-5 minutes to be round for balloon

Tip2.

Leave some gaps when you tight the base with balloon part, the hot air can be released out through these gaps and air pressure not so big, in common round shape

Tip3.

After you want to deflate crystal balloon, please turn off light first after 10-15 minutes the lamp cool then turn off electrical fan, pack the balloon well for next use, take care of safety in plug, no fire flame other things stop electrical fan

Tip4.

In order to resist wind out, we equip 3 sand bags to tripod stand, it can add weight of tripod to enforce resist capability
